Ediciones Tecnológico de Monterrey

International Economic Integration. Challenges and Opportunities for Developing Markets

Autores

Lorena A. Palacios-Chacón, Jahir Lombana-Coy, Patricia Margarita Reynaga-Alcalá

Sinopsis

The main objective of this book is to address the international integration through four chapters, each one highlighting the challenges and opportunities for developing countries, especially emerging ones, as they hold the largest growth potential and the greatest possibility of becoming modern, industrial economies with a higher standard of living (Kolodko, 2002).Throughout each of the chapters, there are questions designed to test the comprehension of each topic. Moreover, at the end of each section, students will find questions and exercises to help them consolidate their learning process. The book ends with a set of conclusions emphasizing the recent growth of most developing economies that have changed free trade geopolitics and how the new world relations bear both challenges and opportunities for these types of economies.
